Plotvisor Release Notes 1

Plotvisor Release Notes

Plotvisor 2.0, 14.10.2015

- Added: Multiple selected files on one plot
- Added: Automatic reloading of changed files
- Added: Log scale
- Added: Text file header support: skip and get column names
- Added: File filter by extension
- Improved: Much faster application start
- Improved: Instant entering to fullscreen mode (it was very slow)
- Improved: Preserving scale zoom when reloading file
- Fixed: Error in parsing column types pattern
- Multiple minor fixes
- The program was renamed to avoid misunderstood (the name 'MagicPlot Viewer' was always interpreted as a free app for viewing MagicPlot Projects). New site was introduced: plotvisor.com

MagicPlot Viewer 1.0.1 (old name), 25.10.2012

- Fixed: Viewer hangs when selecting large binary file if 'Text' tab is opened
- Fixed: Unnecessary reloading when drag-n-drop in file list does not copy anything
- Added: 'Refresh' button in preview panel

MagicPlot Viewer 1.0 (old name), 08.10.2012

- First release.
