Adding and Arranging Curves on Figure Axes 1

Changing Curves Drawing Order 1

Adding and Arranging Curves on Figure Axes

The best way to create a Figure with desired data is to select x and y data columns in Table and use **Create Figure** in Table context menu.

There are different ways to add data to existing Figure:

- Select x and y columns in table with data, open table context menu (right click) and select **Add to Selected Axes** sub-menu. All currently opened Figures are listed in this sub-menu.
- Open **Figure Properties** window and go to **Axes Properties** → **Components** tab. Here you can select the Table in the project tree and press **Add to Axes** button.

You also can add **Fit Curves** or **Fit Sum** from **Fit Plot** to Figure.

Changing Curves Drawing Order

To change Curves drawing order and legend entries order open **Figure Properties** dialog and go to **Axes Properties** → **Components** tab. Drag rows in table to reorder. You can also use **Up** and **Down** buttons or press **Alt + up/down** keys (**Option + up/down** keys on Mac) to move selected row in table up or down.
