MagicPlot Calculator

MagicPlot Calculator is a useful formula calculator which is embedded in MagicPlot (Pro edition only). To open calculator use Tools→Calculator menu item. MagicPlot Calculator can also be used as free standalone software application.

MagicPlot Calculator uses the same [formula syntax](#) as other formula fields in MagicPlot application.

- Type $(12+4)*\sin(\pi/2)$ and press Enter to get the result
- Type $a=5$ to set variable a to 5
- Use Up/Down keys to recall previous expressions
- Use ans (Ans) variable or press Ctrl+Up to insert last result
