# MagicPlot Calculator

MagicPlot Calculator is a useful formula calculator which is embedded in MagicPlot (Pro edition only). To open calculator use Tools→Calculator menu item. MagicPlot Calculator can also be used as free standalone software application. You can download it [here](#)

MagicPlot Calculator uses the same [formula syntax](#) as other formula fields in MagicPlot application. Instead of other formula fields calculator supports comma (,) as decimal separator (1.2 = 1,2) so use semicolon (;) as function arguments separator: min(1;2).

- Type `(12+4)*sin(pi/2)` and press Enter to get the result
- Type `a=5` to set variable a to 5
- Use Up/Down keys to recall previous expressions
- Use `ans` (Ans) variable or press Ctrl+Up to insert last result
- Standard functions and variables (sin, cos, pi, e, etc.) are supported
