Getting Started: Tables, Figures, Fit Plots and Import

MagicPlot projects contain Tables, Figures and Fit Plots.

- Tables contain only numerical data.
- Tables which contain associated data are located in one Folder.
- Fit Plots are intended for non-linear curve fitting and subtracting baselines.
- Figures are intended to graphically represent multiple data.

Get Started

In most cases you may start with importing table from text file by `Project → Import Text Table` menu item.
