# Getting Started: Tables, Figures and Fit Plots

MagicPlot projects contain Tables, Figures and Fit Plots.

- Tables contain only numerical data.
- Tables which contain associated data are located in one Folder.
- Fit Plots are intended for non-linear curve fitting and subtracting baselines.
- Figures are intended to graphically represent multiple data.

## Where to start?

In most cases you may start with [importing](#) table from text file by Project → Import Text Table menu item.
