1

Descriptive Statistics (Pro edition only)

Select **Tools** → **Statistics** menu item to open the statistics dialog. Statistics dialog shows statistics on currently selected table columns or curves on plot. The statistics is updated every time you activate different windows or change the selection in active window. Select multiple instances in one window (columns or curves) to view multiple statistics data.

Column	Points	Mean	Std. Dev.	Min	Max
A Data 1	300	150.5	86.74676	1	300
B Data 2	300	0.03485	0.71376	-1.21779	1.20897

Showed Statistical Properties

By default some statistical properties are not shown. Click **Show** button to select which properties you want to calculate.

Statistical Functions in Column Formulas

You can also calculate statistics on table columns using column statistics functions when entering column formula. See **Functions** tab in **Set Column Formula** dialog for column statistics functions description. These functions are also available in MagicPlot Student edition.
