Table

In **MagicPlot Table** is used to store numeric data. All tables use floating-point numbers.

Empty cells are equivalent to **Missing Values (NaN) in Tables and Calculations** values.

Table Context Menu

Many table editing functions are available in table context menu.

Moving Columns

Hold **Ctrl** key (on Windows and Linux only) or **Alt** key (on Windows, Mac OS, Linux) and drag column header to rearrange table columns. If **Ctrl** and **Alt** keys are not pressed, mouse dragging on header will select the columns.
