Table 1

Table

In [MagicPlot Table](#) is used to store numeric data. All tables use floating-point numbers.

Empty cells are equivalent to [Missing Values \(NaN\) in Tables and Calculations](#) values.

Table Context Menu

Many table editing functions are available in table context menu.

Moving Columns

Hold `Ctrl` key (on Windows and Linux only) or `Alt` key (on Windows, Mac OS, Linux) and drag column header to rearrange table columns. If `Ctrl` and `Alt` keys are not pressed, mouse dragging on header will select the columns.
