Table 1

Table

In [MagicPlot Table](#) is used to store numeric data. All tables use floating-point numbers.

Empty cells are equivalent to [Missing Values \(NaN\) in Tables and Calculations](#) values.

Table Context Menu

Many table editing functions are available in table context menu.

Moving Columns

Hold `Ctrl` key (on Windows and Linux only) or `Alt` key (on Mac OS) and drag column header to rearrange table columns. If `Ctrl` / `Alt` keys are not pressed, mouse dragging on header will select the columns.

Editing Table

You can edit table cell by double click on it. You can either enter a number or an expression. You can write `pi` in cell for example, the result will be 3.1416... .
