Creating Transparent Figures and Fit Plots

To create an image with transparent background open `Figure Properties` or `Fit Plot Properties` dialog window and set `Transparent Background` radio button in `Canvas` tab.

The background of transparent Figures and Fit Plots is shown with a grey-and-white chequerboard. If you are preparing a picture for a dark background you can change the colour of chequerboard to dark grey by selecting `View → Transparency Checkerboard` in main menu.

In case of transparent background you can set the preview background colour in `Image Preview` window.
